

ACT100 TANKS

DUAL WALL UNDERGROUND

ACT-100® Standard Features:

Steel – Fiberglass composite underground storage tank features a double wall steel tank for structural integrity and a 100 Mil minimum fiberglass outer coating for long-lasting corrosion protection. Double-wall design allows continuous interstitial leak detection and monitoring.

- Manufactured and listed in accordance with Underwriters Laboratories UL 58, Steel Underground Storage Tanks for Flammable and Combustible Liquids and UL 1746, External Corrosion Protection Systems for Steel Underground Storage Tanks.
- Built to nationally-recognized STI standards with strict third-party quality control inspection program
- Can be used with a variety of leak detection systems
- Steel provides compatibility with all blends of ethanol and biodiesel fuels
- Steel tank provides structural strength, while its outer coating of fiberglass prevents corrosion
- Compact flat end design reduces cost of installation and allows site layout flexibility
- Various backfill options allows time and money saving installation
- 10 year limited warranty against external corrosion

ACT-100® Available Options:

- Compartmented tanks with single or double bulkheads saves time and space
- Fiberglass sump collars
- Nylon tie down straps
- 30 year limited warranty against external corrosion

Company Owned Trucks Provide On-Time Delivery

Rental & Leasing

Newberry Tanks has Rental Fleet Programs available — inquire for more information.

Export Shipment

From our base in West Memphis, Newberry Tanks has access to the nation's most sophisticated international distribution services. With the world's leading international shipping companies, five class-one railroads, export containers transit to east, west coast, or gulf ports with vessel sailings to serve destinations anywhere on the planet.

Single-wall and dual-wall above-ground bracket, skid, saddle, flameshield, or fireguard tanks meeting Underwriters' Laboratories UL-142 specification for Above-ground Storage of Flammable and Combustible liquids are available for export delivery. Commonly used for fuel storage and lubricant oil storage. Standard accessory package for petroleum fuels includes pump, emergency vent, gage, locking cap assembled on the tank.
